Efficient Lighting Initiative (ELI)

Website: <http://www.efficientlighting.net>

ELI is an international branding system for high-quality energy-efficient lighting products.

The original ELI programme tested the quality certification and labelling concept and focused on seven countries during the period 2000 - 2003. In 2005, the China Standard Certification Center (CSC) was commissioned to develop and expand the ELI certification and branding system globally. The expanded ELI programme is operated by a new institute, the ELI Quality Certification Institute and continues to accelerate the widespread adoption of energy-efficient lighting products and thereby reduce greenhouse gas emissions.

Specifications for energy efficient lighting exist for the product groups of self-ballasted Compact Fluorescent Lamps, double-capped fluorescent lamps, fluorescent lamp ballasts, street lighting, indoor lighting system and LED.
